Silage shovel All-Grip

- Double bearing of the gripping comb
- Continuous wearing runners at the sides
- Extremely hard-wearing scraping edge made of Hardox material
- Tines sharpened at four sides thus ensuring an easy penetration of all kinds of silage
- The bottom plate and the back panel form a strong box section in the change-over area

The advantages of the silage shovel are in its and your versatility.

You can remove silage and pick up bulk material without any problems. The robust design including a scraping edge made of Hardox material and continuous wearing runners at the sides guarantee a long service life. The tines of the gripping comb sharpened at four sides ensure an easy penetration of tough silage.
