

strautmann

Fodder removal by means of Silage cutter clamp

- Closed cutting frame
- Reinforced tine support with conic bearing
- Clean and easy cut, only 8-12 sec. cutting time
- Standard seat for Euro quick-change frame
- Close tine distance, therefore low crumbling loss

Strautmann offers the right cutter clamp with capacities from 0.8 to 2.2 m³ for any farm and any loading vehicle.

The cutting frame is strongly forced through the silage by means of two double-acting hydraulic cylinders. The cutter clamp guarantees a high and clean removal result.
