

50 % less wear!

## Twice the service life with Strautmann ORIGINAL PARTS!

We tested:

- Replica spreading tines compared to Strautmann ORIGINAL spreading tines in Hardox quality
- Test setup: In a VS 2005, 10 spreading tines were replaced by replica parts. After 260 transported loads with a total of 2700t we evaluated the result:

### Replica

4 tines bent due to foreign objects

Damage

Considerable abrasion

Intensive wear

- Frequent change of tines
- Less throughput and chopping
- Worse nutrient supply of soil

All tines undamaged!

 **strautmann**  
ORIGINAL PARTS

Hardly any traces of abrasion

50% less wear

- ✓ Cost-effective
- ✓ Consistent spreading quality
- ✓ Optimum nutrient supply of soil
